

(Junior) Consultant (f/m/d) energy industry

Do you want to actively shape the energy industry? You have a keen interest in the "New Energy World" and would like to become part of a first-class team of consultants?

Then you should definitely apply at E-Bridge: <https://e-bridge.com/career/>

We are hiring!

Your tasks:

- You will support network operators, ministries and investors in implementing the energy transition in projects with high strategic relevance and future orientation.
- Your tasks range from helping to shape the legislative and regulatory framework, to strategy and management projects, to implementing modern operating and planning strategies and processes for grid operators.
- Together, we develop your thematic focus - depending on your professional background and interests.

We offer you:

- You will be part of an excellent multidisciplinary team with very high expertise and international experience in a very motivating and open atmosphere.
- We invest in your personal and professional development and offer you a wide range of opportunities for individual training.
- We offer a very high degree of flexibility in terms of workplace, scope and hours and will work with you to find the perfect solution and compatibility with your private environment.

Your skills:

- You have a very good degree or doctorate with a specialization in electrical engineering, power engineering or renewable energies (also industrial engineering).
- You have solid basic expertise in the field of energy networks through a major field of study, doctorate or professional experience with network operators.
- You have a quick grasp, recognize correlations and draw the right conclusions to find innovative solutions.

Please send your application by email to: bewerbung@e-bridge.com
